

Professional Summary

Pre-final year Computer Science student targeting Software Engineering and Full Stack Development internships. Experienced in building scalable web applications using ReactJS, Next.js, Spring Boot, REST APIs, and AI-powered systems using LangChain, RAG, Vector Databases, and Gemini API. Familiar with Agile workflows, Git branching, CI/CD concepts, Docker, Microservices architecture, and AWS fundamentals.

Education

Mohan Babu University, Tirupati

B.Tech in Computer Science & Information Technology

2023 – 2027
GPA: 8.80/10.0

Sree Krishna Veni Jr. College, Vijayawada

Class 12th (MPC)

2022
Marks: 928/1000

Experience

Freelance Full Stack Developer — Sandhya Granites

Mar 2026 – May 2026

- Built and deployed a responsive business platform using ReactJS, Next.js, Tailwind CSS, and Vercel.
- Improved Lighthouse performance score from 65 to 85 using image optimization and lazy loading techniques.
- Achieved 100/100 SEO and Best Practices scores with 0.2s First Contentful Paint (FCP).
- Collaborated with stakeholders following Agile-style iterative development and Git branching workflows.

Projects

Smart Resume Analyzer

Jan 2026 – Mar 2026

ReactJS, Spring Boot, Gemini API, TF-IDF, Cosine Similarity, REST APIs

[GitHub](#)

- Built an AI-powered full-stack resume analysis platform with automated skill extraction using Gemini API.
- Implemented TF-IDF and Cosine Similarity matching engine achieving 98% accuracy in under 1.5 seconds.
- Developed modular REST APIs with Spring Boot and maintained Git-based CI/CD-ready workflows.

Smart LMS with AI Agent

Oct 2025 – Jan 2026

Python, LangChain, RAG, Next.js, Vector Database, Microservices

[GitHub](#)

- Developed a LangChain RAG-based AI assistant for context-aware technical Q&A and content support.
- Improved content retrieval performance by 60% using optimized Vector Database pipelines.
- Applied Microservices architecture concepts for modular API design and scalable backend structure.

Scam Shield

Jul 2025 – Sep 2025

ReactJS, Firebase, TF-IDF, Firebase Authentication

[GitHub](#)

- Developed a scam email detection platform using TF-IDF text classification with high detection accuracy.
- Integrated Firebase Authentication for secure user sessions with a responsive ReactJS frontend.

ZeroWaste

Apr 2025 – Jun 2025

HTML5, CSS3, JavaScript

[GitHub](#)

- Built a donor-NGO food surplus coordination platform with real-time request matching logic.
- Led a 4-member team during a 24-hour hackathon managing task delegation and on-time delivery.
- Supported 200+ simulated users during hackathon testing.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, C, C++, SQL

Frontend: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Spring Boot, Node.js, REST APIs, Firebase, Microservices Architecture

AI & Data: LangChain, RAG, Vector DB, Gemini API, TF-IDF, Cosine Similarity, MongoDB

DevOps & Cloud: Git, GitHub, Docker, CI/CD Concepts, AWS Fundamentals, Vercel

Testing & Tools: Postman, JUnit, Mockito, VS Code

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, Agile/Scrum

Certifications

Full Stack Development — L&T EduTech

2024

DevOps Fundamentals — L&T EduTech

2024
